ABOUT US

At Electryfy, we believe in creating positive ripples that touch lives and transform communities. This guiding philosophy has shaped our character and inspired us to help others build their own. We recognize that strong character fosters responsible citizens, who in turn contribute to thriving cities, states, and ultimately, a better country. As a family-owned and operated business, we find our passion and drive in serving others, consistently working towards something greater than ourselves.

Founded in 2016 by us—Andersen and Rosa— out of our apartment with nothing but grit, vision, and a few credit cards, we are proud to be licensed and insured electrical contractors in Florida. What truly sets us apart is our commitment to providing a comprehensive experience tailored to your needs with top notch customer service. With dedicated Project Managers guiding you from start to finish, we ensure you have the right products and support throughout your project. Focused on safety and efficiency, we're here to be your trusted partner for all your electrical needs!

WHY CHOOSE US?

What sets **Electryfy** apart from its competitors is our unique position as **suppliers, installers, consultants and project managers.**

LED LIGHTING SERVICES

Dive into the world of optimal lighting with Electryfy's specialized lighting installation services. Our skilled team offers an array of solutions, from lighting fixture installation to lighting retrofit services, enhancing both the beauty and efficiency of your space. We also provide LED lighting services that combine modern technology with sustainability. Let us light up your world with services that resonate with quality, efficiency, and style.

Our carefully selected products carry many certifications. Choose from thousands of UL listed LED products for indoor and outdoor fixtures. Our products have up to 5 and 10-year warranties available from select manufactures and all of Electryfy purchased products carry a one year service warranty.

LED LIGHTING SERVICES

BENEFITS

Efficiency

LED lights use 70-90% less power than traditional light sources.

Environmental Safety

LED lights do not use arsenic, lead, mercury and other harmful gasses.

Reaction Time

Not only LEDs are dimmable, but these can be switched on and off immediately.

Effectiveness

It is said that LED lights emit less glare.

Durability

LEDs are made of solid state components that are resistant to shock and vibrations.

UV-Free

LED lights emit far less ultraviolet radiation and infrared light than traditional light sources.

Color Variety

LEDs come in three standard color temperatures. Some even come in RGB!

Long Lifetime

Left on 24/7, LEDs may last 6 years. Left on only for 6 hours a day, may last 18 years!

Low Maintenance

Due to their lifetime, LEDs are ideal for outdoor and commercial applications.

Size

Come in variety of shapes and sizes, but are universally smaller than 1 square inch.

HOW WE CAN HELP

-  Free lighting audit
-  Free ROI analysis
-  Free incentives research
-  Free lighting designs / Photometric reports
-  LED Retrofit kits available if you want to keep your existing lights
-  New LED fixtures with 5-10 year warranty
-  Indoor and Outdoor areal lifts available
-  Electrical and Lighting experts ready to make your project a reality
-  Value engineering products and solutions

ELECTRICAL VEHICLE CHARGERS SERVICES

Electryfy specializes in electric vehicle charger installation and maintenance, ensuring that you have access to efficient and advanced charging solutions.

Discover the future of eco-friendly energy with Electryfy's comprehensive electric vehicle (EV) charger solutions! Whether for your home or commercial property, we provide top-of-the-line Level 1, Level 2, and Level 3 charging options tailored to fit your needs. Our services include the installation of dedicated circuits and outlets, as well as Level 2 and 3 charger installation, which significantly reduces charging times.

HERE'S WHAT WE OFFER

- 1.Faster Charging Times:** With Level 2 & DC fast chargers, reduce your vehicle's charging time significantly, giving you more freedom and less waiting.
- 2.Increased Energy Efficiency:** Our energy efficiency services ensure that your charging stations use electricity in the most effective way, reducing costs and environmental impact.
- 3.Reliability and Safety:** Professionally installed circuits and chargers mean fewer disruptions and a safer charging environment.
- 4.Customized Solutions:** Whether you need a single home charger or multiple stations at your business, we tailor our services to meet your specific requirements.
- 5.Expert Guidance:** Our team, with years of experience in electric charging station installation, provides insights and advice to maximize your installation's effectiveness.
- 6.Electryfy is committed to delivering high-quality** and reliable solutions that cater directly to your needs, making electric vehicle charging convenient and accessible.

NEW BUSINESS MODEL OPTIONS

We now offer flexible business models designed to meet the needs of different clients, whether you're a homeowner, business, or HOA looking for EV charging solutions.

CONTRACT OPTION #1: YOU OWN IT

- This is our traditional pay-upfront model. You purchase the EV charger and cover installation and permitting costs, giving you full ownership and control. This option is ideal for those seeking independence and long-term savings.

- Complete Ownership: You own the charger and the revenue it generates.
- Full Control: Customize and manage your charging solution according to your needs.

CONTRACT OPTION #2: SHARED COST & PROFIT

- This model allows you to share installation costs. We install the charger at a fraction of the usual price, and in return, we retain a portion of the energy revenue generated. This is a cost-effective option for those looking to enter the EV market with minimal upfront investment.

- Lower Upfront Costs: Save on installation and start benefiting sooner.
- Revenue Sharing: We handle part of the cost, and in exchange, we retain a portion of the energy revenue.
- Great for Businesses: Ideal for property owners and businesses looking to offer EV charging without large upfront expenses.

Choose the model that best suits your strategy, and let's work together to drive the future of sustainable transportation!
