**WE OFFER**

**SALES • SERVICE INSTALLATION**

**CONTRACT OPTIONS**

**#1 YOU OWN IT**

This is our traditional pay-upfront option, where you purchase the EV charger and cover the installation costs and permitting, ensuring complete ownership and control.

**#2 SHARED COST AND PROFIT**

A shared cost and profit model, where we install the charger at a fraction of the usual price. In return, we retain a portion of the energy revenue generated by the charger, providing a cost-effective solution for those looking to enter the EV market with lower upfront investment.

**Choose the model that best fits your business strategy and join us in driving the future of sustainable transportation!**

**\*DISCOUNT IS LIMITED TO 1 CHARGER PER PROPERTY**
